Date: 23rd November, 2026

Subject: Seeking Inputs from Service Exporters on Export-Related Challenges and Facilitation Requirements for Strengthening Delhi's Services Export Ecosystem

Dear Sir/Madam,

Greetings from Services Export Promotion Council (SEPC)!

The Industries Department, Government of National Capital Territory of Delhi, is undertaking an exercise to strengthen Delhi's export ecosystem by assessing the key issues and challenges faced by exporters across various sectors and identifying areas requiring policy interventions, institutional support and export facilitation.

In this regard, the Department has developed a survey to obtain **direct inputs from exporters** regarding their sectoral profile, export activities, key operational and regulatory challenges, market access constraints and facilitation requirements.

As part of this exercise, SEPC invites service exporters based in Delhi to participate in the survey and share their inputs on the challenges and constraints affecting their export operations.

Google Form: Export Survey

All service exporters are requested to submit their responses through the above Google Form by **27 November 2026**.

SEPC also invites service exporters to share any additional suggestions and recommendations that could help address sector-specific challenges, improve the ease of doing business and enhance the competitiveness of Delhi-based service providers in international markets. The same may be shared at saumya.gupta@servicesepc.org

The inputs received will be consolidated and shared with the Industries Department, GNCTD, to facilitate the identification of priority areas for intervention and formulation of appropriate measures for strengthening Delhi's services export ecosystem.

Your active participation and valuable suggestions will contribute towards developing a more conducive and competitive ecosystem for services exports from Delhi.

Thanks & regards,

Team SEPC
